KEEP OUT OF THE REACH
OF CHILDREN**

WARNING

Before using this product, read all Precautionary Statements, Directions for Use, and Conditions of Sale.

PRECAUTIONARY STATEMENT

May cause eye irritation. Avoid contact with skin, eyes, or clothing. Harmful if swallowed or inhaled. Avoid breathing spray mist.

WHAT TO DO IN CASE OF CONTACT

If in eyes: Hold eyes open and flush with plenty of clean water for at least 15 minutes. Get immediate medical attention.

If on skin: Remove contaminated clothing. Wash with soap and water. See a physician if irritation persists.

If swallowed: If ingested, induce vomiting and call a physician at once.

If inhaled: Remove victim to fresh air. Give artificial respiration if

needed. See a physician.

If contact is made with the spray solution containing pesticides, follow the "Statement of Practical Treatment" on the pesticide label.

STORAGE AND DISPOSAL

STORAGE: Do not contaminate food or feed by storage or disposal. Do not store near heat or open flame. Store in original container in a dry location. Keep container closed in storage. Do not allow water to be introduced. Do not contaminate water sources by runoff from cleaning of equipment, disposal of equipment wash waters or spray waste.

DISPOSAL: Triple rinse (or equivalent) and add rinseate to spray tank. Do not reuse empty container. Offer for recycling or puncture and dispose of according to federal, state, and local authorities.

GENERAL INFORMATION

Dart enhances the effectiveness of pesticides and improves pesticide attachment to sprayed surfaces. **Dart** protects pesticides from wash-off due to rainfall, heavy dew, or irrigation. **Dart** extends the life of a pesticide by screening out ultraviolet light and slowing down pesticide volatilization.

DIRECTIONS FOR USE

Apply sprays containing **Dart** at least one hour before an anticipated rain or overhead irrigation.

RATES: Ground equipment or aerial.....1 pint per acre
Hydraulic gun or air blast tree sprayers.....6-8 oz/100 gal
Dilute citrus sprays of 1000 to 1500 gal/acre.....2 pints/500 gal
Concentrate sprays of 100 gal/acre.....1 pint/acre
Turf sprays.....8 oz to 1 pint/acre

Dart should not be applied to food crops within 30 days of harvest with the exception of certain tolerance exempt pesticides; refer to pesticide(s) label for specific recommendations. The use of **Dart** close to harvest may result in visible residue on crops which may render the crops unsaleable. Always read your pesticide label directions for use.

Dart blends easily so that it can be added to the spray tank without premixing with water. Add **Dart** as the last ingredient while the spray tank is filling with the agitator running. Rinse spray equipment, especially nozzles, spray tips and lines with water immediately after use. After rinsing, there may still be a small amount of residue in the tank which should not pose a problem when the sprayer is next used. If the residue from **Dart** needs to be completely removed from a surface, it can be removed with soap and water before the spray deposit dries. If the residue is set and is hard, a petroleum solvent such as kerosene can be used to remove the residue.

CONDITIONS OF SALE: This product conforms to the chemical description on the label thereof and is reasonably fit for the purposes stated on such label only when used in accordance with directions under normal use conditions. Follow directions carefully. Timing and method of application, weather, and crop conditions, mixture with other chemicals not specifically recommended and other influencing factors in the use of this product are beyond the control of the seller. Buyer assumes all risks given herewith. In no case shall the seller be liable for consequential, special or indirect damages such as loss of profits or values resulting from the use of handling of this product.
