

# METH-N-OIL

A nonionic adjuvant for use with preplant, preemergent, and postemergent herbicides.

#### Ingredients:

Methylated canola oil.....83.0%  
 Surfactants and emulsifiers.....17.0%

TOTAL ACTIVE INGREDIENTS 100.0%

\* All ingredients are listed in 40 CFR 180.1001 as exempted from the requirement of a tolerance.

#### CAUTION

#### KEEP OUT OF REACH OF CHILDREN

#### STOP - READ LABEL BEFORE USE

Before using this product, read all Precautionary Statements, Directions for Use, Conditions of Sale

#### HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Harmful if inhaled. Avoid breathing vapors or spray mist. Avoid contact with skin, eyes, or clothing. Do not apply this product in such a manner as to directly or through drift expose workers or others. In addition, follow precautionary statements on the accompanying pesticide(s) label. Do not store near feed or food products.

#### PRECAUTIONARY STATEMENTS

**If swallowed:** If ingested, do not induce vomiting. Call a physician at once.

**If inhaled:** Move victim to fresh air. Give artificial respiration if needed. See a physician.

**If in eyes:** Flush with plenty of water for at least 15 minutes. Call a physician if irritation persists.

**If on skin:** Wash exposed area with plenty of water. Call a physician if irritation persists.

See side panel for additional precautionary statements. If contact is made with the spray solution containing pesticides, follow the "Statement of Practical Treatment" on the pesticide label.

**Example:** If you are using the lowest labeled rate for a postemergent herbicide, then add 1/2 gallon of **METH-N-OIL** per 100 gallons of spray solution. If you are using the highest labeled rate for a postemergent herbicide, then add 1 gallon of **METH-N-OIL** per 100 gallons of spray solution.

When mixing with postemergent herbicides, fill spray tank one-half full with water and begin agitation. Add pesticides and/or fertilizers as directed by labeling or in the following sequence:

1. Dry Flowables
  2. Wettable Powders
  3. Flowables
  4. Solutions
  5. Emulsifiable Concentrates
- Continue filling. Add **METH-N-OIL** last

**Conditions of Sale:** This product conforms to the chemical description on the label thereof and is reasonably fit for the purposes stated on such label only when used in accordance with directions under normal use conditions. Follow directions carefully. Timing and method of application, weather and crop conditions, mixture with other chemicals not specifically recommended and other influencing factor in the use of this product are beyond the control of the seller. Buyer assumes all risks of use storage or handling of this material not in strict accordance with direction given herewith. In no case shall the seller be liable for consequential special or indirect damages such as loss of profits or value resulting from the use or handling of this product.

#### STORAGE AND DISPOSAL

**STORAGE:** Do not contaminate food or feed by storage or disposal. Do not store near heat or flame. Store in original container in a dry location. Keep container closed in storage. Do not allow water to be introduced. Do not contaminate water sources by runoff from cleaning of equipment, disposal of equipment wash waters or spray waste.

**DISPOSAL:** Triple rinse (or equivalent) and add rinsate to spray tank. Do not reuse empty container. Offer for recycling or puncture and dispose of according to federal, state and local authorities.

#### GENERAL INFORMATION

**METH-N-OIL** is a patent-pending adjuvant developed primarily to increase the penetration action of systemic postemergence herbicides. **METH-N-OIL** also offers good spreading characteristics for herbicide coverage during adverse weather conditions. **METH-N-OIL** has been found to increase the stability of some volatile herbicides.

#### DIRECTIONS FOR USE

Mixing instructions: Prior to any pesticide application, the spray tank and all mixing equipment must be thoroughly cleaned. Always read and follow pesticide label(s) before use.

#### Preplant or preemergent herbicides:

**METH-N-OIL** should be premixed with preplant or preemergent herbicides at a 1:1 ratio with the active ingredient of the herbicide. The premix should be added to the spray tank when half-full. Finish filling the tank while agitating.

**Example:** Premix 1 quart of a liquid herbicide containing 50% active ingredient with 1 pint of **METH-N-OIL**. Premix 4 pounds of a dry herbicide containing 50% active ingredient with 1 quart of **METH-N-OIL**. **METH-N-OIL** contains approximately 8 pounds of active ingredient per gallon.

#### Postemergent herbicides:

**METH-N-OIL** should be used at a rate of 1/2% volume/volume for the low rate of postemergent herbicides and 1% volume/volume for the high rate of postemergent herbicides.
